**First Author (* if also presenting author)** | **Presenting Author (if other than first author)** | **Title** | **Presentation** | **Theme** | **Abstract ID** | **Poster board**
---|---|---|---|---|---|---
Adloff, Markus* |  | Different carbon cycle sensitivities in transient simulations initialized from glacial and preindustrial conditions | Poster Session 5 | Theme 2 | 596 | 
Adnew, Getachew Agmuas* |  | Development of an automated system for high-precision determination of a170 of carbon dioxide | Poster Session 6 | Theme 3.1 | 605 | 
Affolter, Stephanie* |  | High altitude CO2 measurements at the Jungfraujoch (Switzerland): Comparison between the Sphinx (3570 m a.s.l.) and East Ridge (3690 m a.s.l.) | Poster Session 1 | Theme 1.1 | 334 | 
Agusti-Panareda, Anna* |  | On the benefits of using high resolution transport and fluxes to simulate atmospheric CO2 variability | Poster Session 1 | Theme 1.1 | 375 | 
Andrews, Arlyn Elizabeth* |  | Top-down constraints on the North American carbon cycle from the first ten years of the North American Carbon Program | Poster Session 3 | Theme 1.2 | 535 | 
Androulakakis, Andreas* |  | Sediment erosion as a component of the global Carbon cycle; assessing the sediment erosion fluxes at the European scale | Poster Session 6 | Theme 3.1 | 595 | 
Barniging, S. Thomas | Manning, Andrew C.* | Evidence for climate driven variability in the seasonal cycles of atmospheric O2 and CO2 from Weybourne Atmospheric Observatory, United Kingdom | Poster Session 1 | Theme 1.1 | 433 | 
Basso, Luana | Salaor, Emmanuel* | Amazon CH4 budget and its controls inferred from regular vertical profile sampling of the lower troposphere | Poster Session 6 | Theme 3.1 | 404 | 
Basu, Sourish* |  | Quantifying Trends in Fossil Fuel CO2 Emissions Using Radiocarbon Measurements | Poster Session 3 | Theme 1.2 | 295 | 
Battaglia, Gianna* |  | Probabilistic assessment of the future marine carbon cycle, ocean deoxygenation and related feedbacks from marine N2O emissions | Poster Session 5 | Theme 4 | 205 | 
Battle, Mark Owen* |  | Measurements of the D2/O2 exchange ratio at Harvard Forest | Poster Session 6 | Theme 3.1 | 373 | 
Becker, Meike* |  | Surface ocean fCO2 maps along the Norwegian coast | Poster Session 3 | Theme 1.2 | 407 | 
Bent, Jonathan* |  | The AirCore Sampler: data and software releases, and a new UAV-based sampling technique for quantifying CO2, CH4 and CO2 point sources | Poster Session 3 | Theme 1.2 | 631 | 
Berger, Bernhardt* |  | Mean ocean temperature change during the last glacial transition | Poster Session 5 | Theme 2 | 127 | 
Berthet, Sarah* |  | Biogeochemical coarsening in a global 1/4° NEMO-PISCES numerical solution | Poster Session 7 | Theme 3.2 | 642 | 
Biraud, Sebastien* |  | The AmeriFlux Network Management Project | Poster Session 1 | Theme 1.1 | 542 | 
Bombelli, Antonio | Heiskanen, Jouni* | Towards policy-relevant global carbon cycle observation and analysis: The GEO Carbon and GHG Initiative | Poster Session 3 | Theme 1.2 | 468 | 
Bopp, Laurent* |  | The future ocean carbon sink: any role for a more complex biogeochemistry? | Poster Session 5 | Theme 4 | 374 | 
Borges, Viviane Francisca* |  | Amazon Atlantic outflow region carbon cycling constrained by atmospheric greenhouse gas data | Poster Session 3 | Theme 1.2 | 240 | 
Bousquet, Philippe | Saunois, Marielle* | The global methane budget 2000-2012: What's next? | Poster Session 1 | Theme 1.1 | 256 | 
Bovensmann, Heinrich* |  | Can passive remote sensing of atmospheric CO2 contribute to anthropogenic CO2 emission monitoring? | Poster Session 3 | Theme 1.2 | 604 | 
Bowman, Kevin* |  | Impact of the 2015 El Niño on the Indonesian carbon balance: implications for carbon mitigation | Poster Session 3 | Theme 1.2 | 431 | 
Bowring, Simon P.K.* |  | Pan-Arctic modeling of permafrost DOC and its lateral transport and evasion in a global land surface model | Poster Session 6 | Theme 3.1 | 227 | 
Bozoino, Denica* |  | 14C in annual plants and the anthropogenic CO2 in the atmosphere | Poster Session 3 | Theme 1.2 | 547 | 
Bradly, Riley Xavier* |  | Carbon Uptake and Ocean Acidification in Eastern Boundary Upwelling Systems | Poster Session 6 | Theme 3.1 | 184 | 
Brer, Holger* |  | Coastal Carbon Budgets: A (Model) View from the Open Ocean | Poster Session 1 | Theme 1.1 | 249 | 
Broekema, Elise R. | Meijer, Harro A.J.* | SO2/N2 and CO2 flask observations at measurement stations in the Netherlands, Ireland and Antarctica | Poster Session 1 | Theme 1.1 | 346 | 
Broekema, Elise R.* |  | Measuring oxygen to unravel the forest carbon balance | Poster Session 1 | Theme 1.1 | 221 | 
Brophy, Kieran* |  | Characterizing uncertainties in atmospheric inversions of fossil fuel CO2 emissions in California | Poster Session 3 | Theme 1.2 | 434 | 
Brouillon Durán, Daniel* |  | Annual and monthly climatologies of seawater CO2 chemistry variables: A neural network approach. | Poster Session 6 | Theme 3.1 | 353 | 
Bruining, Dominik* |  | Measurements and modelling of carbon dioxide in Switzerland: The CarboCount-CH project | Poster Session 3 | Theme 1.2 | 430 | 
Buchanan, David* |  | Southern Ocean Uptake of Atmospheric CO2: Where should we measure it? | Poster Session 3 | Theme 1.2 | 229 | 
Buchmann, Nina* |  | Biogeochemical-atmospheric gas exchange, carbon sequestration and climate sensitivity of two mountain forests | Poster Session 6 | Theme 3.1 | 219 |
First Author (* if also presenting author) | Presenting Author (if other than first author) | Title | Presentation | Theme | Abstract ID | Poster board
--- | --- | --- | --- | --- | --- | ---
Buermann, Wolfgang* | | Mechanisms of Increased Terrestrial Carbon Uptake since the Turn of the Century | Poster Session 1 | Theme 1.1 | 422 | 
Bukosa, Beata* | | GEOS-Chem simulations of simultaneous greenhouse gas measurements (CO₂, CH₄ and CO) from fixed and moving platforms in and around Australia | Poster Session 3 | Theme 1.2 | 211 | 
Burba, George | Miller, William* | Comparison of CO₂ Concentrations, Co-spectra and Flux Measurements between Latest Standardized Automated CO₂/H₂O Flux Systems and Older Gas Analyzers | Poster Session 3 | Theme 1.2 | 031 | 
Burba, George* | | New Tools to Collect and Share Time-Synchronized Hourly CO₂ Flux Data: Coupling Flux Towers and Networks with Proximal and Remote Sensing Data | Poster Session 3 | Theme 1.2 | 016 | 
Burton, Chantelle Amanda* | | Modelling climate change impacts on fire and feedbacks on the carbon cycle | Poster Session 6 | Theme 3.1 | 554 | 
Butzin, Martin* | | Exploring glacial–interglacial variations of the marine carbon isotope record with RECCOM-ciso | Poster Session 5 | Theme 2 | 338 | 
C. Pardo, Paula* | | Carbon uptake and Biogeochemical changes in the Southern Ocean, South of Tasmania | Poster Session 6 | Theme 3.1 | 426 | 
Calle, Leonardo* | | Process attribution of observation-model error via time-series segmentation analysis | Poster Session 7 | Theme 3.1 | 112 | 
Campbell, Joel F.* | | Column CO₂ Measurements using Advanced Intensity-Modulation Continuous-Wave Lidar for NASA ACT-America and ASCENDS Missions | Poster Session 3 | Theme 1.2 | 268 | 
Canning, Anna Rose* | | Field deployment of a CO₂, CH₄ and O₂ sensor package for underway measurement across the full river-ocean mixing regime | Poster Session 3 | Theme 1.2 | 266 | 
Cao, Long* | | Importance of temperature-dependent metabolic rates in simulated ocean carbon cycle response to global warming | Poster Session 6 | Theme 3.1 | 557 | 
Castro-Morales, Karel* | | Three decades of carbon cycle reanalysis with the MPI-CCDAS | Poster Session 3 | Theme 1.2 | 484 | 
Cescatti, Alessandro* | | The atmosphere reveals faster than expected changes in magnitude and seasonality of the land uptake | Poster Session 1 | Theme 1.1 | 420 | 
Chae, Namy* | | Carbon dioxide exchange over the Arctic tundra in Council, Alaska: Controlling factors and contribution of vegetation | Poster Session 6 | Theme 3.1 | 301 | 
Chen, Hulin* | | AirCore observations of CO₂/CH₄/CO₂ profiles and 14CO₂ in the stratosphere | Poster Session 3 | Theme 1.2 | 398 | 
Chen, Jing M.* | | CO₂ fertilization is the major cause for the global carbon sink in 1981-2012 | Poster Session 1 | Theme 1.1 | 603 | 
Chen, Jinghua* | | Spatial pattern analysis on soil carbon sequestration potential of crop-residue return in China based on model simulation | Poster Session 1 | Theme 1.1 | 117 | 
Chen, Zhaohui* | | Inverse estimates of North Atlantic CO₂ uptake using shipboard measurements and surface sites | Poster Session 1 | Theme 1.1 | 212 | 
Chen, Zhuqi* | | A global carbon assimilation system using an ensemble Kalman filter | Poster Session 3 | Theme 1.2 | 204 | 
Dement, Dominic* | | A B**+ Based Extended Multiple Linear Regression Method to Determine Decadal Changes in Anthropogenic CO₂ in the Ocean | Poster Session 3 | Theme 1.2 | 518 | 
Cong, Richao* | | The comparison analysis for various global Greenhouse emissions inventories datasets | Poster Session 1 | Theme 1.1 | 203 | 
Cori, Sébastien* | | 5 years of ICOS compliant in situ GHG measurements at OPE: major results on CO₂, CH₄, N₂O, CO seasonal and diurnal cycles | Poster Session 1 | Theme 1.1 | 370 | 
Córdova-Rodríguez, Kathy* | | Effect of low pH on growth and mechanical properties of valves of Peruvian scallop Argopecten purpuratus (Lamarck, 1819) | Poster Session 5 | Theme 4 | 587 | 
Crowell, Sean* | | Simulation Experiments in Support of GeoCarb | Poster Session 3 | Theme 1.2 | 489 | 
Davies-Barnard, Taraka* | | Effects of ‘natural’ to ‘geoengineered’ nitrogen deposition on the carbon cycle | Poster Session 5 | Theme 4 | 210 | 
Davis, Kenneth J.* | | A sustained airborne campaign to improve inverse flux estimates of greenhouse gas sources and sinks: Results from the Atmospheric Carbon and Transport (ACT) – America mission | Poster Session 3 | Theme 1.2 | 507 | 
DeCola, Philip Lawrence* | | Progress toward an Integrated Global Greenhouse Gas Information System | Poster Session 3 | Theme 1.2 | 528 | 
Deng, Feng* | | Inference Oceanic CO₂ fluxes using space-based and in situ surface observations of atmospheric CO₂ | Poster Session 3 | Theme 1.2 | 522 | 
Deniel, Carole | Broussept, Philippe* | Greenhouse gases from space: a French perspective | Poster Session 3 | Theme 1.2 | 476 | 
Dickerson, Russell R.* | | Measurements of CO₂ and CH₄ in the Baltimore/Washington Area: A Guide to Local GHG Control | Poster Session 3 | Theme 1.2 | 461 | 
Diva, Dino* | | Modeling the Biogeochemistry of Coral Ecosystems under Ocean Acidification and Global Warming | Poster Session 6 | Theme 3.1 | 428 | 
Dobler, Jeremy T.* | | Continuous monitoring and mapping of CO₂ and CH₄ concentrations on scales from 0.4 – 25 km² with GreenLITE™ | Poster Session 3 | Theme 1.2 | 614 | 
Domingues, Lucas G.* | | Amazon Basin biomass burning emission and its correlation with climatology and deforestation | Poster Session 3 | Theme 1.2 | 159 | 
Egleston, Simon* | | Comparison of the atmospheric CO₂ sink due to the marine soft tissue pump during the LGM and MIS 4 | Poster Session 5 | Theme 2 | 426 | 
Egleston, Simon* | | The Global Climate Observing System (GCOS) and the carbon cycle | Poster Session 3 | Theme 1.2 | 923 | 
El Yazid, Abdelhadi* | | Evaluation of a high resolution atmospheric modeling system against observed data from a dense network of continuous CO₂ and CH₄ measurement stations across France | Poster Session 1 | Theme 1.1 | 250 | 
Eldering, Annmarie* | | The OCO-3 Mission : Updated Overview of Science Objectives and Status | Poster Session 3 | Theme 1.2 | 274 | 
Eugster, Werner* | | Impacts of diffuse radiation on crop canopy photosynthesis: a model evaluation at a Swiss crop rotation site | Poster Session 6 | Theme 3.1 | 170 | 
Fajar, Noelia Maria* | | Is the Mediterranean Sea Outflow conditioning cold water corals in the North Atlantic | Poster Session 7 | Theme 3.2 | 144 | 
Fay, Amanda R.* | | Large-scale variability and changes in Southern Ocean carbon: The Drake Passage bellwether | Poster Session 1 | Theme 1.1 | 251 | 
Fernández-Duque, Beatriz* | | CO₂ temporal variations in a rural area of northern Spain described by harmonic and kernel functions | Poster Session 1 | Theme 1.1 | 207 | 
Ferreron, Dominik, Minam* | | Impacts of Different Climate Engineering Scenarios on Rates of Environmental Change and Seasonal Variability | Poster Session 5 | Theme 1.2 | 443 | 
Franco, Ana C.* | | Interannual variability versus anthropogenic trends in ocean acidification in the Humboldt Current System | Poster Session 6 | Theme 3.1 | 339 | 
Frenger, Iva | De Souza, Gregory* | The effect of resolving versus parameterizing the ocean mesoscale on ocean anthropogenic carbon storage | Poster Session 7 | Theme 3.2 | 474 | 
Friedrich, Ronny* | | How much ‘bio’ is in fuel? | Poster Session 1 | Theme 1.1 | 172 |
Frischknecht, Martin*  
Interannual variability of air-sea CO2 exchange, biological production and carbon export in the California Current System from 1979 to 2016  
Poster Session 6  
Theme 3.1  
Abstract ID 226

Hrob, Friederike*  
Impact of North Atlantic freshening on sea surface ECOT2  
Poster Session 1  
Theme 1.1  
Abstract ID 458

Frolking, Steve*  
Long-Term Atmospheric Carbon Dioxide and Radiative Forcing Implications of Persistent Loss of TropicalPEAT Carbon Following Land-Use Conversion  
Poster Session 6  
Theme 3.1  
Abstract ID 556

Fujita, Ryo*  
Variations of atmospheric methane and its carbon and hydrogen isotopic ratios in the upper troposphere/lowermost stratosphere over the Eurasian Continent observed by commercial aircraft  
Poster Session 1  
Theme 1.1  
Abstract ID 635

Gao, Shuang  
Koker, Christoph*  
Simulating the silicon stable isotopic distribution in the Last Glacial Maximum  
Poster Session 5  
Theme 2  
Abstract ID 481

Gaspar, Felipe  
Flores Montes, Manuel de Jesus*  
Spatial and seasonal carbonate parameters variation in the northeastern Brazilian continental shelf  
Poster Session 6  
Theme 3.1  
Abstract ID 562

Gasser, Thomas*  
Budgets of allowable anthropogenic CO2 emissions strongly reduced by permafrost thawing  
Poster Session 5  
Theme 4  
Abstract ID 644

Gehlot, Swati*  
Coupling between the carbon cycle and the lateral hydrology: First implementation of riverine organic carbon transport within MPI-ESM  
Poster Session 6  
Theme 3.1  
Abstract ID 602

Gemayel, Eliassar*  
Estimation of the carbonate system parameters in the Mediterranean Sea  
Poster Session 1  
Theme 1.1  
Abstract ID 018

Gerbig, Christoph*  
Potential of the upcoming IAGOS GHG data stream from passenger aircraft measurements  
Poster Session 3  
Theme 1.2  
Abstract ID 318

Geyer, Nicholas*  
Long-lived and Robust Carbon Dioxide Flux Bias Estimation via SIF and NEE  
Poster Session 3  
Theme 1.2  
Abstract ID 499

Gibert, Fabien*  
Mapping the CO2 field in the atmosphere using lidar: current status and potential for carbon cycle studies.  
Poster Session 3  
Theme 1.2  
Abstract ID 156

Giems, Esther Maria*  
Application of trajectory clustering and source attribution methods for investigating regional CO2 concentrations at Germany’s highest mountain site  
Poster Session 1  
Theme 1.1  
Abstract ID 570

Gilleo, Luke*  
Constraining the Potential Influence of the Ocean Biological Pump on Atmospheric pCO2  
Poster Session 7  
Theme 3.2  
Abstract ID 262

Goecckede, Mathias*  
Model-data-fusion to improve the representation of permafrost ecosystems at the regional scale in a land-surface scheme  
Poster Session 7  
Theme 3.2  
Abstract ID 441

Golf, Daniel  
Raddatz, Thomas*  
Climate-carbon-nitrogen interactions in an Earth System model framework  
Poster Session 6  
Theme 3.1  
Abstract ID 388

Goris, Nadine*  
The subpolar gyre region as benchmark for the future anthropogenic carbon budget of the North Atlantic  
Poster Session 7  
Theme 3.2  
Abstract ID 254

Goto, Dalekue*  
Temporal variations of atmospheric CO2 and CO2 at a coastal site in the northeastern part of the main island of Japan  
Poster Session 1  
Theme 1.1  
Abstract ID 328

Gottschalk, Julia*  
Ventilation changes and carbon cycle dynamics in the deep South Indian Ocean: an important component of atmospheric CO2 changes during the last deglaciation?  
Poster Session 5  
Theme 2  
Abstract ID 519

Grasi, Giacomo*  
Forests key to mitigation in Paris, but science needed to underpin efforts  
Poster Session 3  
Theme 1.2  
Abstract ID 411

Gregor, Luke*  
Seasonal - Interannual - Decadal variability of the CO2 sink in the Southern Ocean: wind stress is still the dominant driver  
Poster Session 1  
Theme 1.1  
Abstract ID 234

Griffith, David*  
Radon tracer flux measurements of CO2, N2O and CH4 in an agricultural environment  
Poster Session 3  
Theme 1.2  
Abstract ID 312

Hagens, Mathilde*  
Elucidating the mechanisms of sedimentary alkalinity release and its impact on the Baltic Sea carbonate system  
Poster Session 6  
Theme 3.1  
Abstract ID 348

Hajima, Tomohiro*  
Strength of CO2 fertilization effect in a new ESM with explicit terrestrial carbon-nitrogen interactions  
Poster Session 7  
Theme 3.2  
Abstract ID 287

Hameau, Angélique*  
Natural and anthropogenic-forced variability in oceanic oxygen and oxygen minimum zones: results from an Earth System Model simulation over the last millennium and the 21st century.  
Poster Session 6  
Theme 3.1  
Abstract ID 313

Han, Pengfei*  
Modeling net primary production across global croplands from 1961 to 2010  
Poster Session 6  
Theme 3.1  
Abstract ID 101

Hassoun, Abed El Rahman*  
Acidification and carbonate system trends in the Eastern Mediterranean Sea  
Poster Session 1  
Theme 1.1  
Abstract ID 580

Hastie, Adam*  
Carbon dioxide evasion from boreal lakes: revised estimate, drivers of spatial variability, and future projections  
Poster Session 6  
Theme 3.1  
Abstract ID 351

Hauk, Justin*  
The fate of carbon and nutrients exported out of the Southern Ocean  
Poster Session 5  
Theme 4  
Abstract ID 276

Hausen, F. Alexander*  
Strengthening of Southern Ocean carbon uptake through increasing stratification  
Poster Session 1  
Theme 1.1  
Abstract ID 110

Haverd, Vanessa*  
Concurrent large-scale drought recovery dominates low-latitude contributions to decadal trends of the land carbon sink  
Poster Session 1  
Theme 1.1  
Abstract ID 299

Haynes, Katherine D.*  
Grassland Productivity Response to the U.S. 2012 Drought: Analysis of Leaf Area Index in MODIS and the Simple Biosphere Model  
Poster Session 7  
Theme 3.2  
Abstract ID 435

Heinemann, Malte*  
Particleballasting in the Hamburg Ocean Carbon Cycle model HAMOC: uncertainties and effect on glacial-interglacial pCO2  
Poster Session 5  
Theme 2  
Abstract ID 623

Hernández Almeida, Iván*  
Core-top calibration of sediment proxy indicators to phytoplankton growth rate for improving past pCO2 estimates  
Poster Session 5  
Theme 2  
Abstract ID 632

Hilman, Boaz*  
Comparison of CO2 and O2 fluxes demonstrate retention of respired CO2 in tree stems from a range of tree species  
Poster Session 6  
Theme 3.1  
Abstract ID 125

Hirata, Ryuchi*  
The effects of forest loss on regional carbon balance of tropical peat forests in Borneo island  
Poster Session 6  
Theme 3.1  
Abstract ID 225

Hoffman, Forrest M.*  
Nonlinear Interactions between Climate and Atmospheric Carbon Dioxide Drivers of Terrestrial and Marine Carbon Cycle Changes from 1850 to 2300  
Poster Session 5  
Theme 4  
Abstract ID 010

Hoshina, Yu*  
Separating short-term CO2 variation into biotic and fossil fuel components based on the atmospheric CO2 and CO2 continuous measurements  
Poster Session 3  
Theme 1.2  
Abstract ID 280

Houwelling, Sander*  
The ESA GHG-CCI multi-model analysis of the combined SCIAMACHY and GOSAT satellite XCO2 record  
Poster Session 3  
Theme 1.2  
Abstract ID 511

Hu, Pin hui*  
Does lower troposphere turbulent CO2-exchange determine plant growth?  
Poster Session 7  
Theme 3.2  
Abstract ID 574

Huang, Mengtian*  
Seasonal responses of terrestrial ecosystem water-use efficiency to climate change  
Poster Session 6  
Theme 3.1  
Abstract ID 549

Huang, Youniyu*  
Matrix approach to land carbon modeling: a case study with CLM4.5  
Poster Session 3  
Theme 1.2  
Abstract ID 558

Hugelius, Gustaf*  
Non-equilibrium soil types in ecosystem models and their impact on simulating global-scale soil carbon distributions  
Poster Session 7  
Theme 3.2  
Abstract ID 284
Towards a more complete carbon balance: Quantifying fluvial carbon fluxes in a wet-dry tropical catchment in north Australia
Poster Session 6
Theme 3.1
Abstract ID 365

A new data-driven estimation of terrestrial CO2 fluxes in Asia using a standardized database of eddy covariance measurements, remote sensing data, and support vector regression
Poster Session 1
Theme 1.1
Abstract ID 541

A synthetic reconstruction of global surface ocean CO2 system parameters and sea-air CO2 flux
Poster Session 1
Theme 1.1
Abstract ID 307

Sediment carbon balance as a proxy of global CO2 increase and geochemical variations in Zanzibar channel, Tanzania, western Indian Ocean.
Poster Session 1
Theme 1.1
Abstract ID 591

Seasonal and interannual variations in the atmospheric Ar/N2 ratio observed by air monitoring networks of Japanese research institutes
Poster Session 1
Theme 1.1
Abstract ID 113

Strong effect of depositional environment on the preservation of organic carbon in sediment or its degradation to carbon dioxide or methane
Poster Session 6
Theme 3.1
Abstract ID 630

Atmosphere–ocean CO2 exchange simulated by a global terrestrial carbon model with high spatial and temporal resolution
Poster Session 7
Theme 3.2
Abstract ID 177

Estimated Contributions of Cold-Region Biophysical and Biogeochemical Processes to Permafrost Soil Organic Carbon
Poster Session 7
Theme 3.2
Abstract ID 363

On monitoring CO2 emissions from anthropogenic sources by GOSAT: Observations of localized CO2 enhancements
Poster Session 3
Theme 1.2
Abstract ID 314

Modeling carbon and Si in the coupled atmosphere-ocean-land-sediment system on glacial/interglacial timescales
Poster Session 1
Theme 1.1
Abstract ID 141

Improving the terrestrial carbon cycle simulated by BNU-ESM
Poster Session 7
Theme 3.2
Abstract ID 286

Responses of the terrestrial carbon cycle to drought: modeling sensitivities of the interactive nitrogen and dynamic vegetation
Poster Session 6
Theme 3.1
Abstract ID 119

A comprehensive estimate of recent carbon sinks in China using both top-down and bottom-up approaches
Poster Session 3
Theme 1.2
Abstract ID 288

pH distributions and controlling mechanisms in the global ocean
Poster Session 6
Theme 3.1
Abstract ID 641

Exploiting error correlations between CO and CO2 in a carbon assimilation system
Poster Session 3
Theme 1.2
Abstract ID 289

Biological Carbon Sequestration in the Ocean: Current Understanding and Future Research Trends
Poster Session 6
Theme 3.1
Abstract ID 567

QuinCe: An online tool for processing and quality control of surface ocean CO2 measurements
Poster Session 3
Theme 3.1
Abstract ID 206

Effects of precipitation anomalies on global terrestrial carbon fluxes from 1981 to 2012
Poster Session 1
Theme 1.1
Abstract ID 371

Intensification of land use and its impact on the preindustrial global carbon cycle
Poster Session 1
Theme 1.1
Abstract ID 401

ICOS Carbon Portal: Elaborated products and services to support European carbon budget estimates
Poster Session 1
Theme 1.1
Abstract ID 347

Forest transition and the time scale of global terrestrial C sink
Poster Session 1
Theme 1.1
Abstract ID 553

Developing a model-based soil organic carbon inventory for agricultural soils in Switzerland
Poster Session 1
Theme 1.2
Abstract ID 122

An urban carbon budget for Auckland, New Zealand
Poster Session 1
Theme 1.1
Abstract ID 627

Detecting changes in ENSO characteristics 850-2100 CE: Insights from the ocean carbon cycle
Poster Session 1
Theme 1.1
Abstract ID 103

20th century changes in carbon isotopes and water-use efficiency: tree-ring-based evaluation of the CLM4.5 and LPX-Bern models
Poster Session 6
Theme 3.1
Abstract ID 633

Comparison and temporal variability of column-averaged dry-air mole fraction of CO2 over selected TCCON sites based on gap FTS and Satellite observations
Poster Session 1
Theme 1.1
Abstract ID 331

Separating temperature- and moisture-driven variations in terrestrial carbon uptake using multiple remote sensing constraints
Poster Session 6
Theme 3.1
Abstract ID 492

Methane Fingerprinting: Isotopic Methane and Ethane-to-Methane Ratio Analysis Using a Cavity Ringdown Spectrometer
Poster Session 3
Theme 1.2
Abstract ID 285

Model Intercomparison of Terrestrial Carbon Fluxes Simulated by CMIP5 Earth System Models and the Sensitivity to the Parameterized Carbon-Nitrogen Cycle
Poster Session 7
Theme 3.2
Abstract ID 148

Effect of assimilating aircraft CO2 observations in CarbonTracker
Poster Session 3
Theme 1.2
Abstract ID 200

Satellite-based analyses of the Arctic sea ice by using Artificial Intelligence
Poster Session 1
Theme 1.1
Abstract ID 569

Effect of crustose lichen on soil CO2 efflux in sphagnum moss regime of tundra, west Alaska
Poster Session 6
Theme 3.1
Abstract ID 034

Changes in Forest Vegetation by GHG and Limited Carbon Sink by Forests in Korea
Poster Session 5
Theme 4.0
Abstract ID 022

Plant-growth responses to elevated CO2 – a reanalysis of prior observations
Poster Session 3
Theme 1.2
Abstract ID 025

Modelling carbon in permafrost soils from preindustrial to the future
Poster Session 6
Theme 3.1
Abstract ID 209

Oxygen flux measurements as a new tracer for the carbon and nitrogen cycles in terrestrial ecosystems
Poster Session 6
Theme 3.1
Abstract ID 402

Using the Suess effect on the stable carbon isotope to distinguish the future from the past in radiocarbon
Poster Session 5
Theme 4.0
Abstract ID 208

A global SD model for the triple oxygen isotopic ratios in atmospheric CO2
Poster Session 1
Theme 3.1
Abstract ID 261

Concurrent underway measurements of surface pCO2 and total alkalinity in Kuroshio-Oyashio transition region
Poster Session 6
Theme 3.1
Abstract ID 319

Climateology of continuous greenhouse gas measurements at Kjølnes, Northern Norway

Abstract ID 138
Kysely, Jan*  -  Heat waves and cold spells in Central Europe under different climate change scenarios  
Lacroix, Fabrice*  -  Implications of riverine nutrient and carbon fluxes derived from a weathering model on the ocean biogeochemistry  
Landschützer, Peter*  -  Observation-based evidence for a changing seasonal cycle in ocean pCO2 in response to rising atmospheric CO2  
Langlais, Clothilde*  -  Stationary Rossby waves dominate subduction of anthropogenic carbon in the Southern Ocean  
Lansing, Alice Sophie*  -  Nutrient enrichment and forest management experiments in Sweden to constrain the process-based land surface model ORCHIDEE  
Largavaara, Markus*  -  Expert opinions on the cost of increasing ecosystem carbon  
Lauerwald, Ronny*  -  Simulating C transfers through the terrestrial-aquatic continuum of the Amazon  
Laufkötter, Charlotte*  -  Temperature-dependent remineralization - impact on the marine carbon cycle  
Lauvaux, Thomas*  -  Catching butterflies with fishing nets: Are atmospheric greenhouse gas models adapted to current and future observations?  
Laussel, Sri Kali  -  Global indicators of ocean uptake: a pilot study  
Lavric, Jost Valerie*  -  Five years of CO2/CH4/CO measurements at the Amazon Tall Tower Observatory (ATTO, Brazil) - site and source area characterisation  
Law, Rachel M.*  -  The contribution of aerosol cooling to historical land carbon uptake  
Le Quéré, Corinne*  -  Limits to emissions verification from unaccounted semi-decadal carbon variability  
Lebetoh, Alice*  -  Understanding and predicting trends in North Atlantic CO2 uptake  
Lees, Kirsten Jennifer*  -  Measuring peatland carbon sequestration and emission by remote sensing  
Lefevre, Nathalie*  -  Air-sea CO2 flux on the continental shelves of the western tropical Atlantic  
Leuenberger, Markus C.*  -  10-years of combined CO2 and O2 measurements at two remote sites of Jungfraujoch, Switzerland and Puy de Dôme, France  
Levin, Ingeborg*  -  Long-term changes of D14CO2 in the global atmosphere  
Li, Hongmei*  -  Decadal predictions of the oceanic carbon sink: skills and challenges  
Li, Yangchun*  -  Entrainment velocity and Tropical Pacific air-sea CO2 flux during ENSO events simulated in CMIP5  
Li, Yue*  -  Disentangling biotic and climatic effects on interannual variability in water use efficiency across terrestrial ecosystems in China  
Lienert, Sebastian*  -  A Monte Carlo data assimilation to constrain model parameters, terrestrial carbon uptake, and carbon emissions from land use  
Lindroth, Anders*  -  Atmospheric ISCG measurements in ICES Sweden  
Linkhorst, Annika*  -  Variability of methane ebullition across timescales in a tropical reservoir  
Liu, Huizhi*  -  Biophysical effects on the interannual variation in carbon dioxide exchange of an alpine meadow on the Tibetan Plateau  
Liu, Junjie*  -  Responses of tropical terrestrial biosphere carbon cycle to the 2015-2016 El Niño  
Liu, Yuxi*  -  CarbonTracker Switzerland: Quantifying the net terrestrial biospheric carbon fluxes in central Europe and Switzerland for 2013  
Lo Monaco, Clare*  -  CO2 monitoring in the South-West Indian Ocean during the last three decades  
Loh, Zoe M  -  The Australian Greenhouse Gas Observation Network – current status and vision for the future  
Lopez-Coto, Israel*  -  Investigating the propagation of meteorological model uncertainty for tracer modeling  
Louchard, Dominique*  -  The impact of the Amazon River plume on the CO2 sea-air exchange in the Tropical Atlantic Ocean  
Lovenduski, Nicole*  -  Ocean and land carbon uptake: Can we predict the future?  
Machado-Silva, Fausto*  -  Droughts trigger reduction of net primary production in the Amazon  
Machida, Toshinobu*  -  Present activities and future plan for CONTRAIL project  
Machler, Lars*  -  Towards a novel continuous sublimation extraction/laser spectroscopy method to unlock the greenhouse gas record in deep ice  
Maier, Joeran*  -  Evaluating the relevance of micrscale processes for carbon fluxes with a global ocean carbon cycle model  
Maier, Marie-Sophie*  -  Spatial and temporal variations of CO2 and CH4 fluxes in the Danube Delta  
Makela, Jarno  -  Multimodel parameter optimization of JSBACH canopy conductance, GPP and ET formulations against micrometeorological flux data at boreal sites  
Maki, Takashi*  -  Observing System Experiments with Multiple Satellites for Carbon Cycle Analysis using the Local Ensemble Transform Kalman Filter  
Mandic, Magda*  -  Measuring the CO2 isotopic composition in terrestrial ecosystems Studies in natural and controlled environments  
Manfred, Manfredi*  -  Modeling the response of CO2 uptake of the Arctic Ocean to recent climate change  
Marquez Lenicina Avila, Jannine*  -  Evolution of the carbonate properties in the Gerlache Strait, Northern Antarctic Peninsula  
Matsuhaga, Tsuneo*  -  CO2AT and GO2AT - Data Products, Science Achievements, and Future  
Mayer, Dorethea George*  -  Climatic consequences of large-scale herbaceous biomass plantations as climate engineering tools  
McKain, Kathryn*  -  Global observed CO2 distributions from the Atmospheric Tomography (ATom) Mission and comparison to the NOAA surface reference network, remote sensing observations from OCO-2, and a global inversion system  
Meijer, Yasja*  -  State of play for a European operational monitoring system for fossil CO2 emissions
